

# TRANSDIGM

GROUP INC.

TransDigm is a global aerospace and defence firm that designs, produces and supplies highly engineered aircraft components for use on nearly all commercial and military aircraft in service today.

The Company manufactures a wide range of products – including cockpit security systems, parachutes and antimicrobial and touchless technologies that make aviation safer - as well as actuators, controls, pumps, valves, switches and relay panels, cockpit displays and many other components and systems. TransDigm also designed and produced the parachutes that ensured NASA's Perseverance Rover made a successful landing on Mars in 2021.

TransDigm is NYSE listed with approximately 14,200 employees world-wide and over 100 manufacturing sites. Typically, approximately 65% of revenues are from commercial markets and about 35% are from defence.

TransDigm has grown consistently since it was founded in 1993 by acquiring assets and investing in innovation, engineering and development at our operating units to improve product quality, ensure on-time delivery and solve customers' technical issues.

The Company began operating in the UK in 2012 when it acquired AmSafe Bridport – a Dorset-based safety systems business.

**TransDigm has a strong track record of investment in its British businesses and has invested over \$100 million in its UK businesses to date through capital expenditures, research and development and engineering.**

It now employs approximately 2,000 people across nine UK manufacturing sites – reflecting its deep commitment to the country.

The Company is active in the defence sector and has contracts with the Ministry of Defence and Home Office - as well as the civilian aviation market. Major private sector customers include Boeing and Airbus as well as prime contractors like BAE Systems.

TransDigm's operating model emphasises local autonomy. Each operating unit has its own management team who create their own business development strategy and chooses its own brand name with the most value to the customers. TransDigm's management teams are encouraged to think and act as owners with decisions made locally. The Company's businesses are united in their dedication to delivering reliable, quality parts efficiently and on time.

# TransDigm Presence in the UK

**CHELTON**

**Headquarters:**  
Marlow, Buckinghamshire, UK

**Other Key UK Location:**  
Newmarket, Suffolk, UK

**Date Acquired:**  
January 2021

**Key Products:**  
Antenna systems, anti-jam GPS, radios, vehicle intercoms

**DARCHEM ENGINEERING**

**Headquarters:**  
Stillington, Stockton-on-Tees, UK

**Other Key UK Location:**  
Gloucester, UK

**Date Acquired:**  
March 2019 (Esterline)

**Key Products:**  
Insulation systems, aerostructures, honeycomb systems, thermal protection

**IRVINGQ**

**Headquarters:**  
Llangeinor, Bridgend, UK

**Other Key UK Location:**  
Letchworth, Hertfordshire, UK

**Date Acquired:**  
December 2013

**Key Products:**  
Aerial delivery solutions, personnel parachutes, safety and survival equipment

**AUXITROLWESTON**  
ADVANCED SENSORS

**Key UK Location:**  
Farnborough, UK

**Date Acquired:**  
March 2019 (Esterline)

**Key Products:**  
Engine and aircraft instruments for measuring temperature, speed, and pressure

**AMSAFE BRIDPORT**

**Headquarters:**  
Bridport, Dorset, UK

**Date Acquired:**  
January 2012

**Key Products:**  
Cargo restraints, protection and safety systems

**DDC**  
AEROSPACE POWER SYSTEMS

**Key UK Location:**  
Ryde, Isle of Wight, UK

**Date Acquired:**  
June 2016

**Key Products:**  
Data bus networking solutions, power control & conversion, transformers

## Diverse Products, Platforms and Markets

TransDigm produces, designs and supplies a wide variety of highly engineered aerospace components, systems and subsystems used on nearly all commercial and military aircraft in service today.

 Ignition Systems & Aircraft Sensors	 Pumps	 Valves	 Motors, Actuators & Controls	 Water Faucets & Systems	 Quick Disconnects, Couplings & Rods	 Batteries, Chargers & Power Conditioning
 Aircraft Hardware & Cockpit Security Systems	 Engineered Composites, Elastomers, Thermal Protection & Laminates	 Switches & Relay Panels	 Audio, Radio & Antenna Systems	 Lighting, Instrumentation & Cockpit Displays	 Safety Restraints & Parachutes	 Lifting Devices & Cargo Handling Systems
